

ROAD REHABILITATION

RP-Series Tools

Engineered specifically to optimize your road-planing productivity and profitability — no matter how challenging your operating conditions!

- Tough tip geometries yield superior impact strength and outstanding service life
- Extra-heavy, extra-hard body means exceptional durability — and substantially less tool wash
- Equipped with a pre-compressed, easy-to-install, full-length retainer — for unsurpassed bore protection
- Come standard with a hardened-steel washer — for outstanding tool rotation within the block

Kennametal will significantly boost your asphalt and concrete cutting performance!

Let us prove it.
