

We found a way to keep oil rigs drilling 10 times longer.
Will anyone else? Don't hold your breath.

What problem can we solve for you? One drilling operation was tired of bringing up nothing but worn bearings. So they asked us to extend the life of these critical components. Today they average 300 hours of uninterrupted operation, up from just 30. Our metallurgical engineers can find similarly innovative solutions to the problems you're facing, then deploy and support them globally. Find out more at kennametal.com.
